## PROJECTS / CURRICULUM DESIGN

---

**Graduate Student Tutor Double Selection System** 2020.9  
*Based on Java, NodeJS, Swift language. Backend using SpringBoot, SpringDataJPA framework. Database using MySQL. Frontend using React.js. Mobile using SwiftUI framework. This project completes the design of a system for the double selection of graduate students and supervisors.*

**Online Compilation and Practice Platform** 2020.1 - 2016.6  
*Based on Java, NodeJS to achieve an online compilation and practice platform. Supports students, teachers, administrators of the user rights. Teachers can publish test questions, and students can compile test questions and use judging questions automatically. This project won the Second prize in national competition. I used Express framework for the first time, and learned how to use Java to call other code programs locally. The front end uses React.js.*

**Covid-19 Epidemic Data Analysis** 2020.10  
*Spark curriculum design: Spark SQL was used to analyze large quantities of CSV data of the epidemic, which was imported into the MySQL database. KOA was used in the background to design the interface, and Baidu Echarts was used in the foreground to make charts.*

**Civil Aviation Booking Management System** 2019.12  
*SQLServer course design adopted SpringBoot at the back end and Thymeleaf template engine at the front end. Bootstrap was used to adjust the front end style*
